

s.s."INGRID THORDEN".

-----

It is submitted the Helsingfors Surveyor be informed that it is noted that the wells are proposed to be filled in with material having scantlings similar to those already fitted in the ship. The existing arrangements have been investigated and it is found that the scantlings are not such as would permit of the minimum freeboard for a complete superstructure ship to be assigned, and the permissible reduction from the existing freeboard would be 3". Provided the scantlings and arrangements as shewn and amended on the plan now submitted be carried out to the satisfaction of the Surveyor, the same could be approved for the amended class, viz: 100A1. with freeboard.

A copy of the C.11 form should be sent for the Surveyor's information as desired.
