Lloyd's Register of Shipping.

GLASGOW REPORT No 51000

Port GLASGOW,

5th November, 1930.

This is to Certify that

H.L. SUTHERST

the undersigned Surveyor to this Society did at the request of Messrs. Barclay, Curle & Co. Ltd., of Glasgow, survey during construction, Two Riveted Starting Air Receivers 10'1½" long by 1½" internal diameter, and intended for use in their S.S. No. 642 (S.M.V. "NORFOLD").

The materials employed in the manufacture of the Receivers have been tested by the Surveyors to Lloyd's Register of Shipping and the scantlings are in accordance with the Rules of this Society for a working pressure of 600 lbs. per square inch.

The workmanship is good.

The Receivers, having been tested in the presence of the undersigned on the 19th February, 1930, by hydraulic pressure of 800 lbs. per square inch, showed no signs of weakness and were found to be satisfactory in every respect at that pressure.

Working pressure not to exceed six hundred pounds per square inch.

Mark on Receiver:-

No. 18688
LOYD'S TEST
800 lbs.
P. 600 lbs.
