Memorandum of alterations reported since ship was surveyed for assignment of Load Lines in _____

INSTALLATION OF PATENT STEEL HATCH COVERS.

These steel hatch covers of "Macanking" type, were built under survey at the plant of Farand and Delorme, Montreal, in accordance with the approved plans.

NOW DONE:

All hatches examined during and after installation, both in place and in stowed position and witnessed the operation of opening and closing which was found satisfactory. Upon completion, a thorough hose test was applied to covers and coamings, the top, side and end gaskets being proven tight. These patent steel hatch covers are, in my opinion, well constructed, properly installed and efficiently perform the duty for which they are intended. (Mtl. Rpt. 8 No. 4868 dated 29.5.39)
