

Oil Barge "SERVICE SHELL VI".

It is submitted the Rouen Surveyor be informed that it is noted the Builders state that the length of this barge has not been altered and that the length reported by him is the length measured by the French Customs on the deck. As he has not commented on this, he should be requested to verify the length on the waterline and report to this Office.

If the length is 129 feet as given on the plans, the freeboard would be 514 mm. as stated by the Owners.

With regard to the other points raised in the Builders' letter, these will be dealt with on receipt of the Surveyor's report.
