Re. Previous tele request re closing
this vessel for one loaded voyage to scrap VARNIA - PLOUAS - INDIA.
The following instructions apply:

1. Surveyors VARNIA - Should inform us earliest BR Survey status & reason if any current COC apply. to enable firm re-closing survey instructions to be given.
2. For Guidance, whilst B.R. are not members of IACS their survey records would be considered for credit in this instance provided attending surveyors from investigation on board are satisfied.

3. Provided existing class survey records are in order and there are no overdue machinery surveys or conditions of class (any such to be reported earliest for consideration) then:

- 3.1. Generally examine Main & Aux Machinery, Pumping Systems, electrical systems, Control systems & Steering Gear & thoroughly test these systems on Completion to ensure satisfaction for intended voyage, to be carried out together with measurement of electrical system insulation resistance, satisfactory running clearance of shafts & bearings.
- 3.2. Flux Tester Safety valves to be adjusted under steam.
- 3.3. Satisfactory deviation to satisfy survey to be carried out on completion.

4. Machinery Certificates to make clear to Owners that vessel is declared for one voyage only loaded from VARNIA - PLOUAS - INDIA for demolition with a suitable time limit. Further surveys to fully report on in Ref 9 with continuation sheets with full narrative.
