

COPY.

29th November, 1926.

Dear Mr. Warlow,

Many thanks for your letter of the 26th instant, regarding the case of the s.s. "KAHANUI".

In all the circumstances it is thought that your suggestion to charge a fee for the survey of the electric installation of this vessel on the 8 kilowatts basis is a proper one, and should be followed.

I note what you say on the general subject, and should explain that the present case has been dealt with on its own merits in view of the special additional fee charged for supervising the carrying out of the specification, and is not intended to be taken as a precedent.

With kind regards,

Yours faithfully,

P. L. Warlow, Esq.,

GLASGOW.
