

**COPY.**  
of "H." Dept. Form.

From the Surveyor at LENINGRAD.

M.S. "SIBIR."

9th April, 1930

With reference to your report No. 57 I shall be glad if you will ascertain and let me know further what arrangements have been made for an automatic feed control apparatus of approved type to be fitted to the water tube donkey boiler, and for the safety valves of this boiler to be adjusted under steam.

26th April, 1930

A communication dated the 16th instant received from the Owners, the "Sovtorgflet", in reply to my enquiry of the 14th instant, states that the automatic feed control apparatus of the Mumford type will shortly be fitted to the water tube donkey boiler of the above vessel and at the same time the safety valves of the boiler may be adjusted under steam.

Owners also mention that the above fittings have also been ordered for the remaining five refrigerated motorships viz. "ALEXEY RYKOFF", "IAN HYDZUTAK", "FELIX DEERJINSKY", "SMOLNY", and "COOPERATEIA".
