16th February, 1926.

Dear Sirs,

With reference to Newcastle Report No. 80093 recently forwarded to this Office respecting Messrs. Palmers S.B. & I Co. Ltd - Boiler No.1058, intended for Messrs. The James Dredging Co. Ltd., I have to say it is concluded that the longitudinal joints of the shell are treble riveted, the back tube plate is 11/16" thick, and that each girder has 2 stays, but I shall be glad if you will confirm this.

I am, Dear Sirs,

Yours faithfully,

Secretary.

The Surveyors,

NEWCASTLE-ON-TYNE.
