Dear Sir,

Ansd.....

Hopper Dredger "MANNIN".
Liv. Rpt. No.133233.

In reply to London letter Classn.(S), of the 24th instant, respecting the Survey recently held on this vessel, it was understood from the information in our possession that an Annual Survey in lieu of the usual Special Survey at four yearly intervals, was specially considered and agreed to by the British Corporation, with a view to assisting the Owners by acting in an advisory capacity at each Annual Survey, regarding running repairs.

The last record of Machinery Survey is 1,47 and from copies of records in this Office, it would appear that the machinery has been surveyed on a continuous basis, although no definite arrangement to this effect is on record.

From an examination of the parts recently opened up in conjunction with those parts seen at previous Annual Surveys, it was concluded that the vessel was entitled to a record of M.B.S.-5,51.

As some dubiety appears to exist about the complete examination of the machinery during the past four years, we should be glad to be informed what still remains to be done.

To clarify the position in the future, we consider that it should be agreed with the Owners, and placed on record that the machinery is being surveyed on a continuous survey basis.

Yours faithfully,

The Secretary,
LIVERPOOL.
