Dear Sirs,

## CLASSING LETTER

"GIUSEPPE GIULIETTI". 27938. As recommended.

I shall be glad if you will forward some details of the main gear teeth pitting; which gear wheels or pinions are pitted, and the approximate depth and area affected.

It is concluded that the steam heated steam generator safety valves were adjusted to 114 lbs. per square inch (W.P 135 lbs per square inch) at the request of the Owner's representative but your confirmation is desired.

The main feed heaters do not appear to have been examined for some time and I shall be glad if you will request the Owners to arrange for their examination early in the new cycle.

Classification Certificates in respect of the hull and machinery are enclosed herewith.

"MARIANNE". I acknowledge the receipt of your letter dated the 31st May last, with enclosure, the contents of which have been noted.

I shall be glad if you will confirm that screw down non-return valves are provided in the bilge system in accordance with Paragraphs E.245 and E.246 of the Rules.

I shall be glad if you will state the output and give particulars of the generator set now fitted, and confirm that there are now three diesel generator sets only fitted.

Yours faithfully, Lloyd's Register

pro Clerk to the  
Classification Committee

The Surveyors,  
GENOA.
