

LIV. SURS

Copy of letter about the "W.D.TEAL".

Westminster Dredging Company  
Tug "W.D.TEAL".  
Davey, Paxman & Co. 12RPH Engine  
No. 54303.

We enquired from the Westminster Dredging Company about the diesel engine for the "W.D.TEAL", in the light of your letter of the 4th February. These Owners now state that it is not yet certain in which tug the machinery will be placed as they have 4 T.I.D. type tugs and do not know which one is to be available first. In the event, however, of their deciding to build the installation into the "TEAL", they would withdraw this ship from class.

We shall no doubt hear further when the Owners decide on their arrangements."

The Surveyor.  
Spurich
