

X  
N/N EVANGELISTRIA V

Enclosures.

(Copy of the Gr. & all its  
admiral)

19th January, 1948.

Dear Sirs,

S. I enclose for your information a copy of a communication which has recently been received from the Society's Surveyors at Hull respecting the Motorship "VATNAJOKULL", together with one received by them from the Owners.

In the circumstances I shall be glad if you will furnish me with your remarks thereon.

You will observe that it is stated by the Electrical Engineer Surveyor at Hull that he has surveyed the electrical installation and reports that the original cables were of pyrotenax and the ends had not been properly sealed off in the special manner required for cables of this type. In this connection I have to refer you to Circular No. 1801 which deals with the special precautions and procedure necessary for this type of cable. You should therefore state whether these were in the present instance carried out to your satisfaction.

Yours faithfully,

Clerk to the  
Classification Committee.

The Surveyors,

STOCKHOLM.
