

E X T R A C T from Kob. Clsg. Ltr. d'd. 13. 4.56.

3366 - As recommended.

3253 "JINGU MARU" This ship has today been classed #100A1 "Carrying Petroleum in Bulk" together with the various notations as recommended by you. Please let me know if crankcase explosion relief devices are fitted to the diesel auxiliary engine and at the same time give the heating surfaces of the following main boiler items:-

Generator, water wall, superheater, economiser.

This information should be stated in your Reports 5c in future cases. It would be appreciated if the Builders would insert these figures in all plans submitted for approval.
