The Owners regret that it has
not yet been possible for them to
obtain the requisite plan of the
boiler. Further attempts in this
direction are, however, being made
and they hope to be able to revert
to the matter shortly.

As regards the Screwshaft Survey
they are not in a position to state
definitely when this survey can be
carried out but they will make arrange-
ments for the inspection to be held on
the occasion of the vessel's drydocking
in about 2 or 3 months' time.
