"HAKONESAN MARU"

Shipbuilders: Messrs. Mitsui SB & Eng Co. Yard No. 580.

Engineers: Messrs.

Engine No.

Kobe Surveyors letter 9.7.54.

It is submitted the Surveyors be advised it is noted from the above letter that in the case of this vessel the connections for the water defrosting system have been made permanent.

— As this is contrary to the general intention of the International Load Line Convention, arrangements could be made for part of the water supply line, in conspicuous place, to be made portable, and in such a way that the portable section is in place only when defrosting is in progress.

26.7.54.
