

"FRANCESCO BIBOLINI"

F.E. Rpt. Genoa 19628

It is submitted the Genoa Surveyors be referred to their F.E. Report No. 19628 on the above vessel in regard to the origin of the P.403 steel used in the construction.

The mill sheets received have been compared with Plan No. AB 1003 and it appears that the sheets relating to Upper deck stringer plates No. 142 and 143 in way of poop are missing. They should be asked to confirm that these two plates are of P 403 steel and should state their origin.
