The Secretary,
London.

Dear Sir,

Cpn. F.E.Rpt. No. 20168 - m.s. "KOSMONAVT"

With reference to the classing letter of the 28th June, we return herewith the Rpt. 5c. As the exhaust gas boiler is made at Helsingør Skibsværft and the steam drum at Messrs. Burmeister & Wain of Copenhagen, details of the drum and its safety valves have not been inserted. A Rpt. 10 as per copy enclosed was, however, forwarded with our Rpt. No. 20168 covering the examination under Special Survey and testing of the steam drum.

Regarding the safety valves we have to inform you that a 80mm single directly spring loaded safety valve is fitted on the steam drum in accordance with the Nakskov Skibsværft drwg. No. 166-744, approved 15th January, 1962 for the Nakskov Skibsværft Yard Nos. 166/7 which are sister vessels to the m.s. "KOSMONAVT" in this respect.

On completion of installation of the steam drum the safety valve was adjusted under steam to 100 lbs. and the accumulation of the valve was also tested with the steam drum used in conjunction with the exhaust gas heated unit and found satisfactory.

Yours faithfully,

SURVEYOR TO LLOYD'S
