

Steamer "BEECH HILL"

Mr. Burnett of the Counties Ship Management Company Limited states that this ship has been laid up in Greece since January 1963, and the Owners now have the possibility of a prompt charter.

They are therefore requesting the year of grace for the Special Survey which fell due last May and enquire as to what will be our minimum requirements.

Owing to the pressure on drydocking accommodation in the Eastern Mediterranean at the present time the Owners wish to defer docking the ship until about November next. She was last drydocked in November 1962.

3rd September 1963
