

LLOYD'S REGISTER OF SHIPPING

Järntorget 3,

Gothenburg SV, 10th October, 1960.

ENCLOSURES.Reference
Classn(S)

The Secretary,

LONDON.

Dear Sirs,

"ROSPIGGEN" - Gothenburg F.E. Rpt.26050.

In reply to your classing letter dated the 30th September, 1960, we have pleasure in forwarding herewith a General Arrangement Plan for your information.

We can also confirm that the steel used was manufactured at works recognised by the Committee and tested in accordance with the Rules, and regret that this was omitted from our report.

Regarding the chain cable, the certificate of test has just recently come to hand and we can state that the breaking test thereon is 27630 kgs. However, at the time of examining the chain cables the particulars had to be taken from the markings stamped on the cables, and the breaking test stamped thereon was in fact 25665 kgs. as reported.

Now that certificates are available it is regretted that some inaccuracies have been found in the report largely due to reading off particulars from the anchors without the aid of certificates. Corrected particulars are given on the enclosed cuttings which we should be glad if you would kindly attach to the F.E. report.

Yours faithfully,
THE SURVEYORS, Gothenburg.
