"BREEZE" 2554 The contents of your report are noted but it is not proposed to assign the recommended notation of S.S. No.3 until the vessels oil tanks have been examined, as this item is still outstanding in connection with the Special Survey. I would refer to your report No.2412 and shall be glad to learn whether the indented bow plating referred to therein has received the necessary attention or still requires to be dealt with at the Owners' convenience. The machinery notations recommended by you, also a Docking Date of 5.45, have been assigned.
