Lloyd's Register of Shipping,

SYDNEY.

Recd. 16.3.48.

29th January, 1948.

Dear Sir,

In reply to your classing letter of the 5th December last regarding our reports 21148 on the "PANT" and 21161 on the "ROM", we have to state that the thickness of the raised quarter deck plating is 5/16 and 1/4 inch and the forecastle deck plating is 5/16 inch.

Further, the new rudder stocks were made before our survey was requested and no forging reports are available.

We would add that the above remarks apply also to the sister vessels "BUCKIE" (Syd.Rpt.20830) "HUMBER" (Syd.Rpt.21287) and "CHELMER" (Syd.Rpt.21344).

Yours faithfully,

The Surveyors.
