

Ship's name "VERNICOS GIORGIS"

~~Boat~~

~~Box~~

L.R. 5272440

In view of all requirements for SS and Reclassification having been complied with during the survey held by the Liverpool surveyors between 11.8.81. and 11.9.81. the vessel was eligible to be reclassified ~~Al~~ Tug, Mersey Estuary Service - Limiting point seawards - Bar Lightship, provided it remains in the above service area.

The vessel was also considered suitable for a delivery voyage from Bangor (N. Wales) to Piraeus direct which would result in the above service limits being deleted and the class suitably amended, effective from date of departure.

The requirements for the delivery voyage as outlined in SR endorsement 7.7.81. were based on the SS being completed at Piraeus as proposed by the Owners, and to the vessel making the voyage in a "free running" condition.

In view of the complete SS and Reclassification survey having been held at Liverpool, a General Examination would be required on arrival Piraeus in order that the Surveyors could satisfy themselves as to whether or not any damage had been sustained on the voyage, and in order that a suitable Class could be assigned.

The Owners were also requested to advise this office of the proposed service area.

Since vessel is understood to have departed from Bangor with two other vessels in tow this contravened the Society's regulations and in the circumstances it is submitted a contemplated Class notation ~~Al~~ Tug (with specified service limit) would be considered valid up to date of vessels departure with tow.

NOTE: At no time did the Owners advise the Society that the delivery voyage to Piraeus was to be made with two other vessels in tow.
