

8th March, 1962.

CURACAO

6413, 18, 20 - As recommended.

6402 "SHELL MANAURE" - As recommended. It is concluded that the requirements of Circular No.2106 dated 27.11.57 have been complied with in conjunction with the measuring at this time of the shell plating and internals with audiogauge, but your confirmation is desired. I shall be glad if you will furnish the actual thickness ascertained by drilling if this is possible.
