Dear Sir,

"KOBU MARU"

Nagasaki Report F.E.835

In reply to your classing letter dated 25th March, we have to confirm that the diameter of the screwshaft should be 470 m/m. and regret this was reported in error as 520m/m.

We note that the torsional vibration characteristics are approved without a barred speed range and also your remarks regarding the omission of the responsible signature on Report 13.

Yours faithfully,

*MacLeod*

For the Surveyors.

The Secretary,  
LONDON.
