PARTICULARS OF DEFECTS, REPAIRS, ALTERATIONS, ETC.

The E.G. heated boiler has been found with the tubes and the internal surface of the boiler shell and tube plates heavily scaled. It has been stated that since heavy leakage has been noted the boiler was only used as a silencer. All doors and mountings are in good condition. It has been recommended not to use the boiler until properly repaired.

It is recommended to consider the record, previously assigned, completed without the E.G. and its safety valves.

The reason for repairs must be stated and those on account of damage, the alleged cause of which must be given, should be detailed separately from wear and tear repairs. State what action has been taken regarding items which are subjects of class. State also where appropriate, for the information of the Technical Records Dept., the material of the defective item and whether it is a forging, casting or welded fabrication. Any alterations in existing particulars in the Register Book should be reported above.
