

'Stannoyal'

hwe. 105710

It is submitted that
this vessel is eligible for
THE RECORD.

Lloyds Rule. 11.48

S Rule. 11.48

In order that the Ice melting capacity be recorded in the Register Book the Hwe Surveyors should be requested to confirm that the refrigerating machines are capable of running at the rated speed of 230 R.P.M.

It is noted that the report indicates 150 R.P.M. and it is concluded that the cooling down tests were carried out with the machines running at this speed. X
