

Messrs. Vickers-Armstrongs' No.858,  
"EMPIRE VICEROY".

Dimensions:- 445' x 63.42' x 33.5'.

A precis of the correspondence regarding the  
"EMPIRE ELAINE", Yard No.856, was sent on the 20th November, 1942.

The remarks contained in that statement apply to  
Yard No.858, except as follows:-

It will be noted that the length of the vessel has  
been increased by 35'. The bulkhead notation will not be  
required, as the watertight bulkhead on frame No.176 has been  
extended to the upper deck.

The rider plates at the top of the hatch side girder  
were delivered 1'11 $\frac{1}{2}$ " in breadth instead of 2'0", and it was  
agreed no objection need be taken.

The remarks in the last two paragraphs regarding the  
rivet spacings will not apply in this case.

W.S.

10th September, 1943.
