THE PRINCIPAL

22nd April, 1955.

Dear Sir,

s.s. "ANDROS VENTURE"

Classn.(H)

I have to acquaint you that last June the Basrah Surveyors recommended that all plugged and distorted screen tubes and No.1 back wall riser tube in the starboard boiler should be renewed on the vessel's arrival in the United States.

As no information was received to the effect that this item had received attention enquiries were made of the Montreal Surveyors and last month they replied that the matter had been referred to New York.

In the circumstances I shall be glad to learn how the case now stands with regard to the above item of survey and also to the carrying out of the Water Tube Boiler Survey which became due last November.

Yours faithfully,

Clerk to the
Classification Committee.

The Secretary,
NEW YORK.
