

"ANDROS VENTURE"

IT IS SUBMITTED that before this case receives consideration the Quebec Surveyors should be requested to forward plans for approval as required by Paragraph E.401 of the Rules or alternatively, if these plans have been previously approved for a sister ship, they should state the name and yard number of the vessel.

Also the Surveyors should state if the generators and motors over 100 KW have been built under survey and if certificates of test for generators and motors under 100 KW have been supplied and the results found as per Rule, as this information has been omitted from their First Entry Report.

The Surveyors should also be requested to state the heating surface of the boiler superheaters as the total heating surface of the boilers as quoted in their report does not include superheater heating surface.

*See mtl letter of 6/5/54 + 27/5/54.*
