

m.v. "BROOKLYN MARU".

KOB
NAG

7546.
1069.

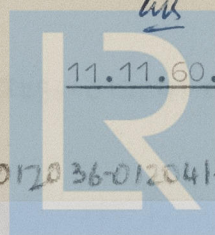

Before this case receives consideration, Submitted Nagasaki Surveyors be informed the certificates covering fan motors for the RMC installation cannot be traced in this Office and are awaited.

Their attention should be drawn to Kobe Certificate No. M-63265 which appears to cover the fans only, and not the motors. It was also stated in the specification that the motors would be supplied by the Shipbuilders.

Attention should also be drawn to the necessity of forwarding all documents relating to the RMC installation with the RMC First Entry reports, and not with those for the hull and propelling machinery.

Further, dimensions which have been approved in millimetres need not be transposed into inches. This only adds to the Surveyor's work and work in this Office.
