

"ARES 111"

(26.9.66)
Mr. Fikaris of Aegis Shipping (London) Ltd., phoned/ regarding the above ship, stating that he had not yet heard from his principals in Piraeus regarding the survey arrangements for completion of the outstanding requirements for a full SS.

He stated that the ship is at present in Madras and would remain there until the end of the first week of October.

Mr. Fikaris raised the question of a postponement of the outstanding items, but would not give a definite proposal i.e. a date by which the items would receive attention.

I explained that if a definite proposal were received it would have to be considered by our technical staff and then submitted to the Committee for consideration.
