

REPORT ON OIL ENGINE MACHINERY.

No. 99250

10 MAY 1954

Date of writing Report 26-4-1954 When handed in at Local Office 28-4-1954 Port of ANTWERP

No. in Survey held at SERAING & ANTWERP Date, First Survey 31.7.52 Last Survey 19

Reg. Book. Number of Visits 69

40809 on the Twin Single Screw vessel m/t "SALAMIS" Tons Gross 12826
Triple Quadruple

built at Hoboken By whom built D. & J. Fr. Cockenice Yard No. 764 When built 1954

Engines made at Dusseldorf By whom made do. do. Engine No. 6767 When made 1954

Donkey Boilers made at do. By whom made do. do. Boiler No. 47915/12 When made 1954

Horse Power Maximum 7700 S. & A. Ltd. & A. & S. Dalmatian Port belonging to Oslo

Service 1540. MN Is Refrigerating Machinery fitted for cargo purposes no Is Electric Light fitted yes

Trade for which vessel is intended unrestricted

ENGINES, &c. — Type of Engines Burrell & Tain 9,74 VTF 140 2 or 4 stroke cycle 2 ✓ Single or double acting single ✓

maximum pressure in cylinders 50 kg/cm² Diameter of cylinders 740 ✓ Length of stroke 1400 ✓ No. of cylinders 9 ✓ No. of cranks 9Mean Indicated Pressure 6.5 kg/cm² ✓ Span of bearings (i.e., distance between inner edges of bearings in

day of a crank) 948 Is there a bearing between each crank no Revolutions per minute Maximum 125 ✓ Service 115 ✓

Flywheel dia. 3420 Weight 1635 kg Moment of inertia of flywheel (lb.in² or Kg.m²) 5750 ✓ Means of ignition comp. Kind of fuel used heavy fuel

" " " " balance wts. (" " " ") 1 Crank pin dia. 520 mid. length breadth 1120 Crank webs shrunk thickness parallel to axis 270

Crank shaft, Solid forged dia. of journals as per Rule. as fitted. 520 with 1/2 central hole ✓ Crank webs mid. length thickness 120 Crank webs thickness around eye hole 395

All built as per Rule. Intermediate Shafts, diameter as per Rule. Thrust Shaft, diameter at collars as per Rule.

Flywheel shaft, diameter as per Rule. as fitted. 50.2 ✓ Thrust Shaft, diameter at collars as per Rule.

Tube shaft, diameter as per Rule. as fitted. Screw Shaft, diameter as per Rule. Is the tube shaft fitted with a continuous liner 9

Bronze Liners, thickness in way of bushes as per Rule. as fitted. 2.5 Thickness between bushes as per Rule. Is the after end of the liner made watertight in the

propeller boss 2 If the liner is in more than one length are the junctions made by fusion through the whole thickness of the liner no

If the liner does not fit tightly at the part between the bearings in the stern tube, is the space charged with a plastic material insoluble in water and non-corrosive no

If two liners are fitted, is the shaft lapped or protected between the liners no Is an approved Oil Gland fitted at the after

end of stern tube no If so, state type

Length of bearing in Stern Bush next to and supporting propeller 1890 ✓

Propeller, dia. 5220 Pitch 466 (a.70) o. of blades 4 Material bronze whether moveable no Total developed surface 10,362 sq. feet

Moment of inertia of propeller including entrained water (lb.in² or Kg.m²) 19050 Kind of damper, if fitted none

Method of reversing Engines camshaft Is a governor or other arrangement fitted to prevent racing of the engine no Means of

Vibration face Thickness of cylinder liners 52 Are the cylinders fitted with safety valves no Are the exhaust pipes and silencers water cooled

or lagged with non-conducting material lagged If the exhaust is led overboard near the waterline, what means are arranged to prevent water from being siphoned back to the engine

Cooling Water Pumps, No. and how driven one steam 370 m³/hr Working F.W. one

W. and Spare F.W. one S.W. one Is the sea suction provided with an efficient strainer which can be cleared within the vessel no

Bilge Pumps worked from the Main Engines, No. and capacity none Can one be overhauled while the other is at work

Bilge Pumps connected to the Main Bilge Line No. and capacity of each three one 370 m³/hr; one 120 m³/hr; one 75 m³/hr

How driven steam Is the cooling water led to the bilges no If so, state what special arrangements are made to deal with this water in addition to the ordinary bilge pumping

Arrangements one attached to M.I. 450 m³/hrBallast Pumps, No. and capacity E.R. one 370 m³/hr Power Driven Lubricating Oil Pumps, including spare pump, No. and size two independent 25 m³/hr (each)one 50 m³/hr Are two independent means arranged for circulating water through the Oil Cooler no Branch Bilge SuctionsNo. and size:—In machinery spaces 100 m³/hr 70 m³/hr Cofferdams 70 m³/hr In pump room: 70 m³/hr Cyl. 50 m³/hrIn holds, &c. See remarks overleaf. 270 m³/hr Main pump room: 100 m³/hrDirect Bilge Suctions to the engine room bilges, No. and size 100 m³/hr 2 ✓ 270 m³/hr 2 ✓

Are all the bilge suction pipes in holds and tunnel well fitted with strum-boxes no Are the bilge suctions in the machinery spaces led from easily

accessible mud-boxes, placed above the level of the working floor, with straight tail pipes to the bilges no

Are all Sea Connections fitted direct on the skin of the ship to fabricate they fitted with valves or cocks no Are they fixed

sufficiently high on the ship's side to be seen without lifting the platform plates no Are the overboard discharges above or below the deep water line below

Are they each fitted with a discharge valve always accessible on the plating of the vessel no Are the blow off cocks fitted with a spigot and brass covering plate (dressing plate) C.V.

What pipes pass through the bunkers coffee dam suction a fore peak ballast How are they protected extra heavy steel pipe with all joints E.W. ✓

What pipes pass through the deep tanks Have they been tested as per Rule

Are all pipes, cocks, valves and pumps in connection with the machinery and all boiler mountings accessible at all times no ✓

Is the arrangement of valves and their connections such as to prevent the possibility of water passing from the sea or from water tanks into the cargo or machinery spaces, or from one compartment to another no Is the shaft tunnel watertight no Is it fitted with a watertight door no worked from

If a wood vessel, what means are provided to prevent leakage of either fuel oil or of lubricating oil from saturating the woodwork

Main Air Compressors, No. two ✓ No. of stages two diameters 135 / 305 stroke driven by steam engine

Auxiliary Air Compressors, No. one ✓ No. of stages one diameters — stroke — driven by —

Small Auxiliary Air Compressors, No. one ✓ No. of stages two diameters 52 / 47 stroke 65 driven by electric motor

What provision is made for first charging the air receivers small tank air compressor driven by hand started motor

Scavenging Air Pumps or Blowers, No. two ✓ How driven from main motor (chain drive) Engine Nos. one 6 eng. 9 gen. set No. 5384

Machinery of plant Steam eng. 250 B.S.E.M. 2000 ft. Report

AIR RECEIVERS:—Have they been made under survey. State No. of report or certificate *Ref. 10. N° 75437*
 State full details of safety devices. *one safety valve*
 Can the internal surfaces of the receivers be examined and cleaned. Is a drain fitted at the lowest part of each receiver.
 Injection Air Receivers, No. *none* Cubic capacity of each. *—* Internal diameter. *—* thickness. *—*
 Seamless, welded or riveted longitudinal joint. Material. *—* Range of tensile strength. *—* Working pressure. *—*
 Starting Air Receivers, No. *two* Total cubic capacity. *20 m³* Internal diameter. *18.5* thickness. *—*
 Seamless, welded or riveted longitudinal joint. *welded* Material. *S.M. steel* Range of tensile strength. *41/47 kg/mm²* Working pressure. *25 kg/cm²*

IS A DONKEY BOILER FITTED If so, is a report now forwarded.

Is the donkey boiler intended to be used for domestic purposes only.

PLANS. Are approved plans forwarded herewith for shafting *9-1-53/17-6-53/18-1-53* Receivers *16-6-53* Separate fuel tanks *22-6-53* Built
(if not, state date of approval)
 Donkey boilers *2-11-53 / 13-1-53* General pumping arrangements *16-4-53* Pumping arrangements in machinery space *26-5-53*
 Exhaust gas economiser *5-11-53 / 20-1-53*
 Oil fuel burning arrangements *26-5-53*

Have Torsional Vibration characteristics been approved. Date and particulars of approval *20-5-53* Boiler

Has the spare gear required by the Rules been supplied. State if for "short voyages" only.

State the principal additional spare gear supplied.

SPARE GEAR.

The foregoing is a correct description,
G. L. Collett

Manufacturer.

Identification marks on air receivers	<i>LLOYD'S TEST</i> <i>28-2-53</i> <i>T.R. 4/12-53 W.R. 25/4/53</i> <i>Ref. 6 N° 15449</i> <i>27-11-53</i>			

Welded receivers, state Makers' Name *D. & J. John Cockrill (Dunring)*

Is the flash point of the oil to be used over 150°F.

Have the requirements of the Rules for oil fuel pipes and tank fittings been complied with.

Full description of fire extinguishing apparatus fitted in machinery spaces *Steam smothering to B.R. & E.R. & a CO₂ fire extinguisher installed two fire hydrants with hose 1/2" nozzles. In B.R. & E.R.: 6 foot approx. of 2 gal. cans and of 10 gallon. one fire hydrant 1/2" nozzles. Is the vessel (not being an oil tanker) fitted for carrying oil as cargo. — If so, have the requirements of the Rules been complied with.*

What is the special notation desired. *—*

If the notation for ice strengthening is desired, state whether the requirements in this respect have been complied with.

Is this machinery duplicate of a previous case. *no*

If so, state name of vessel. *—*

General Remarks (State quality of workmanship, opinions as to class, Speed restrictions, &c.) *The machinery of this vessel has been built and installed under the special survey of the Society's surveyors in accordance with the Rules. The approved plan and the Secretary's letter. The materials and workmanship are good. satisfactory. Trials and sea trials were witnessed and the machinery is eligible, in our opinion, for a speed of 14.54 and rotations of 100 revs.; T.S.C., 08 185 lbs. and one economiser 185 lbs. subject to the safety valves of both donkey boilers being removed and the pumping arrangements of the dry cargo hold being placed in order before the end of the guarantee period in September 1954.*
Note:- The oil engine generator set N° 8182 and the two steam eng. generators set N° 26813 / 14 have been installed under survey and full load running trials witnessed.

NOTE:- For pumping arrangements in fixed dry cargo hold see our Ext. Engg. N° 26743 of the 6th April 53 and for proposed modifications see plan N° 768-D-713.

The amount of Entry Fee charged for *5,000,-* *5,040,-* *56,665,-*

Air Receiver *Special* *—* *—* *—*

2 Donkey Boilers *ECONOMISER* *Fee... £ 33.930,-* *£ 10.170,-*

Travelling Expenses (if any) *£ 19.050,-*

Installation, etc. *£ 27.105,-*

Committee's Minute *FRIDAY 9- JUL 1954*

When applied for *15-4*

When received *21-4*
