

Innoshima, 1st March, 1957.

Ref.
Classn(S)

Dear Sir,

Kobe Report No. 3494 "NAESS VENTURER"

In reply to the query contained in your letter of 18th December last, we wish to confirm the followings;

1. The number of 2" tubes in each main boiler is 153, as stated in our report,

No. of drum tube (Screen tube) 2"	88 pcs.
No. of water wall tube (Side W/W tube) 2"	38 pcs.
No. of water wall tube (Back W/W tube) 2"	27 pcs.
Total	153 pcs.

2. The fire extinguishing arrangements, including emergency fire pump driven by oil engine, have been made in accordance with the Rules.

It is a regret that this was omitted as old form of report used.

3. A steam generator is on board, and the certificate issued.

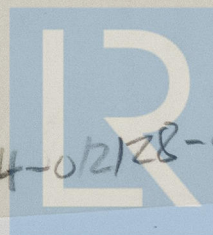

Copy of certificate enclosed herewith

Your remarks of using Report 4a for such a generator will be adhered to.

Yours faithfully,

Y. Amada
For the Surveyors.

The Secretary
London.
