1. We enclose a copy of our letter of 23rd March, 1987 addressed to the Authority with copy of enclosures referred to and advise that we have already had a preliminary discussion regarding the four ships referred to.
2. Subject to a final decision by Owners after their investigation of the potential value of the ships, we believe there is a real chance of re-classification.
3. From our relations with Owner's Technical Staff, we are confident the ships have been well maintained since withdrawal from Class, therefore we would appreciate your urgent preliminary advice on requirements for re-classification and loadline assignment and in particular the method of reporting.
