Dear Sirs,

## S.S. "ORIENTAL GIANT"

As the screwshaft was found to be in accordance with the Rules for four yearly surveys at the survey recently held at Nagasaki, it will be in order for future Screwshaft Surveys to be held at four yearly intervals. The Owners should be advised that this means that the next survey will require to be held by the end of April 1971, and that it is their responsibility to ensure that crack detection tests are carried out at each survey.

You should also inform the Owners that if at any docking intermediate between Screwshaft Surveys the wear-down of the sternbush is, in the opinion of the Society's Surveyor, excessive, the shaft will require to be drawn and the bush relined.

Yours faithfully,

The Surveyors,  
YOKOHAMA

Assistant Classification Manager,
