GENERAL REMARKS (State quality of workmanship, opinions as to class, &c.)

This engine has been built under special survey in accordance with approved plans. Society's Rules and Secretary's letters. All materials have been tested as required and the workmanship found good.

After completion the engine has been tried on makers testbed under full load conditions and found with driven generator and air compressor working satisfactorily.

This set is in my opinion eligible to merit the favourable consideration of the Committee.

The engine has been shipped to Haltonville (Rotterdam District).

Copy certificates of crankshaft, aircompressor and makers test sheet of generator attached hereto.
