Ship and Engineer Surveyor
P.O. Box 175
San Nicolas
ARUBA, N.A.

Dear Sir:

S.S. "BARBOSA"

Please be informed that, while S.S. "BARBOSA" was lying at Los Haticos at Maracaibo on April 6th, boilers' safety valves were floated by me on a maximum working pressure of 135 lbs/sq.inch.

The height of the compressing rings was reduced to:

Port	8.97	m.m.
Starboard	7.70	m.m.

Yours truly,

Sgd. _____

J. DRENTHE.
