

3rd February, 1950.

SOUTHAMPTON.

20055. As recommended.

20074 "ATHLONE CASTLE" As recommended.

In reply to your letter of the 1st instant there will be no objection to the Screw shaft Survey being postponed until June or July this year as requested, bearing in mind that the 6 months grace normally allowed for these inspections would carry it to August next.

"RINGEBILL" I am in receipt of Mr. Coslett's letter of the 12th ultimo and note his remarks regarding the new diesel generator set fitted in this vessel.

As, however, no First Entry Report appears to have been received as in the other cases mentioned, I shall be glad if Mr. Coslett will state in the first instance, whether these two generators were constructed under Special Survey, or alternatively whether they were opened out for Special Survey at the time of installation.
