Extract from London letter, dated 23rd April, 1954, regarding Greenock Report No. 25109 on the Motorship "DAVANGER".

---

"It is also desired to know in this, and in all future cases where an exhaust gas 'boiler' is fitted, whether the 'boiler' is used only in conjunction with the Scotch Boilers or whether it can function independently. In the first case the 'boiler' is considered as an economiser, and in the second case as a boiler."
