Received from Chief Engineer Surveyor

11.3 DEC 1960

SHIP'S NAME mv. NISSHUN MARU REPORT Kobe No. 8410

CS advanced.  
ABS due 9/60<sup>61</sup> now partly held.  
Docking, Repairs.

Some main engine parts renewed.

It is submitted that the vessel **WILL BE** eligible for the record ABS. 11/60 when the survey has been completed, as per this Rpt.

Assign ABS 11/60  
(See Cert dated 7/11/60)

Kobe City 29/12/60

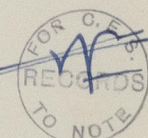

18/11/60  
Note for RB.

It is concluded that both the auxiliary boilers were examined and their safety valves adjusted but this should be confirmed by the surveyor as the ABS is incomplete, a record of ABS 11/60 now should not have been recommended and the Surveyors should be asked to issue an amended interim Certificate accordingly and stating the item remaining to be done to complete the ABS.

Amend "WTDB" to "WTAB"
