

BOARD REPORT on the *MV. "Sud Atlantic"*.

It is submitted the Cpn. Surveyors be informed that as freeboard is a condition of the class of this vessel it will be necessary for the freeboards assigned by the Norwegian authorities to be approved by the committee.

They should therefore forward a memo of the freeboards assigned including all the seasonal allowances for the consideration of the Committee.

It is assumed that storm valves are fitted to the Scuppers from the 2nd lower deck in accordance with the rules but the Surveyors should forward particulars. They should also give particulars of the Hatchways and Supports on this deck.
