

"LADOGA" & "AMUR"

Yard No 355 + 356

Hals. Rpts No 828 + 840

The Surveyors should be advised that with reference to their letter of 18-8-65 it is concluded that the "AMUR" is at Odessa. Suggest class to be assigned could therefore be 100A1 "Dredger" "Black Sea Coasting Service" and in the case of the "LADOGA" 100A1 "Dredger" "Gulf of Anzur Coasting Service". It should be noted that the ships should be generally examined on arrival in these areas but as in previous cases - Harina Yard No 850-859 - this examination could be waived.

An early reply should be requested stating whether or not the above service limits are acceptable to the Owners.
