(NAKA P. O. BOX 92)
HIROSHIMA, JAPAN.

Reference

4th March 1964

Dears Sirs,

"LIKHOSLAVL"

We wish to acknowledge receipt of the machinery certificate for the above ship.

This has been checked and it is noted that the approved pressure of the auxiliary W.T. boiler (secondary drum) is given as 228 lb per sq. inch and not as stated in our first entry report 256 lb per sq. inch.

In the circumstances the Certificate is being retained in this office pending your reply and we should be grateful if you would confirm that the figure stated is correct.

Yours faithfully,

For the Surveyors.

The Secretary,
LONDON
