

22nd December, 1961.

BUENOS AIRES

33295, 311 - As recommended.

RMC 33349, 57, 63 - As recommended.

3306 "COLORADO" - As recommended, except that the class has been continued subject as previously recorded.

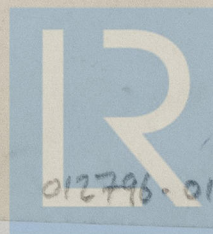

32674 "HERNANDARIAS" This ship has today been classed+Al "Oil Tanker" "For service on the rivers Parana and Uruguay limiting ports La Plata and Buenos Aires" together with the appropriate notations recommended by you, except that notations of SS 4,61 and DS 8,60 have not been assigned.

I shall be glad if you will state the number and size of the main and auxiliary air receivers and the independent air compressors and also forward the requisite certificates.

The approved plan shows fresh water coolers but these have been omitted from your report and in the circumstances I shall be glad to receive your comments regarding this matter.

In all future cases where information is omitted from the Rpt.4b for main machinery constructed at other ports you should answer all sections in your Rpt.4b which are required for classification.

I would draw your attention to the delay which has occurred in forwarding the First Entry Report on this ship in view of the fact that the last date of survey was the 28th April last and the report was completed on the 15th May.
