.....C.....

Dear Sir,

"KEREMPE"

We now forward our Rpt. No.5881 for a General Examination held on the above ship. It will be seen that the last date of hull survey was 31st May, but since that time the vessel has been out of service pending a decision by the Owner as to whether or not he would proceed with further repairs, and we did not, therefore, consider the survey closed. In fact the Owner completed the Main Boiler Survey at the beginning of this month, and has put the ship back into service. For this reason our Report is forwarded showing the last date of hull survey as May 31st.

We have ascertained from the Owner that he now considers that the cost of repairs involved would not, in view of the age of the ship, be worthwhile and it seems that he is now thinking of scrapping the vessel and replacing by new construction.

Yours faithfully  
For the Surveyors,

The Secretary  
L O N D O N
