Ans'd

reference

Dear Sir,

asn(S)

S.S. "MARIAROSA AUGUSTA"

Trieste Rpt. N°. 14790

First Entry

With reference to your letter of the 3rd instant we note that the diameters required for the first entry report 4a under the heading "diameter at wheel shrouds", are the diameters of the wheel shafts in way of the wheel hubs.

These wheel hubs are a taper fit on the shafts and the diameters are as follows :-

1st	361.08	-	368 mm.
Main	721.77	-	737 mm.

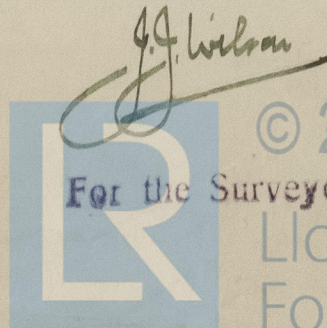

We have previously been of the opinion that the wheel shroud referred to the wheel rim and the diameters reported were the internal diameters of the wheel rims.

We shall be guided by your letter clarifying this point in our future reports.

Regarding the post script to your letter, this has been answered in a separate letter of same date.

Yours faithfully

The Secretary  
London
