

TRI Ch LET. 1.7.58.

14790 "MARIAROSA AUGUSTA" This ship has today been classed *100A1 "Carrying Petroleum in Bulk" together with the appropriate notations recommended by you.

I shall be glad if you will forward to this office the approved plans of the Midship Section and Profile & Decks together with the "As Built" Profile plan as these do not appear to have been forwarded with your report as required by Circular No. 1962 and stated in the General Declaration.

Plans of poop and bridge should also be forwarded for verification of particulars in your report together with a capacity plan as the information in your report is insufficient for full particulars of the tanks to be recorded in the Register Book.

Please state whether No. 5 tanks port, centre and starboard are fitted for the carriage of water ballast only, as this has been done on similar ships for the same Owners built at other shipyards.

012853-012860-0281 1/2 Cont'd....

- 2 -

1st July, 1958.

TRIESTE. (Cont'd.)

With regard to the machinery, I shall be glad if you will state:-

1. the diameters of the wheel shafts in way of wheels as the diameters now reported as 2M and 4M would appear to be incorrect.
2. whether a steam heated steam generator has been fitted on this ship.
