

L. 1820.

MIDDLESBROUGH-ON-TEES.

22nd. November, 1912.

-----WILLIAM MORRISON,-----

Messrs. C.H.Walker & Co. examine the steel Multitubular boiler No 3132, built by Messrs.F.gudron & Co.,Ld., stockton-on-tees, and intended for their S.S.No 206.

The boiler was examined by the undersigned under full working steam pressure of one hundred and twenty-five pounds (125) per square inch, on the 19th. November. 1912, and also internally and externally on the 21st. November, 1912, and was found tight, sound and otherwise in good condition.

The boiler referred to is

stamped as shown below:-

- No. 4960
- Lloyd's Test
- 250 lbs.
- 10:10:12, W.M.
