"TANDJUNG TORAWITAN" RPT. No.5660 - DTA 9/11

Dear Sir,

The "TANDJUNG" Class vessels have two DB lubricating oil drain tanks (one forwd. and one aft.) situated under the main engine and reduction gearing, between the two longitudinal cofferdams, the capacity of these tanks is approximately 2.2 and 1.0 tons respectively.

There is also a DB oil fuel overflow tank situated at the aft. end of the foregoing mentioned cofferdams, the capacity of this tank is approximately 3.8 tons.

These small DB tanks through an oversight, have not been mentioned on the last page of the First Entry Reports 1 of the above vessels, but will be listed on the Reports 1 of the remaining three vessels.

Yours faithfully,

J.A. Boater
