To be filled in at Head Office.

Particulars of Classification (which must be inserted precisely as in Register Book and Supplement)

Surveys must be reported in the terms of the Rules. The nature and extent of Examinations and Repairs (if any) must be stated in detail, the parts examined and their condition being clearly indicated. For Annual, Special or other Condition Surveys the Summary of Examination and Condition on the back of the Report is to be carefully completed and amplified if necessary in the body of the Report. Outstanding items to complete the Survey should be summarised at the end of the Report. The reasons for Repairs must be stated. Repairs on account of Damage (the alleged cause of which must be stated) should be separated from Repairs due to other causes, and, besides being detailed in the body of the Report, should be summarised in the form below. When, at a Special Survey, the Shell and Deck Plating is drilled the results must be reported on Report 8(Dr). Whenever Anchors or Chain Cables are replaced or retested the necessary particulars are to be given on Report 8(Eq) which is to be attached to this Report.

Was a damage report made by anyone else? If so, by whom?

EXAMINATION AND REPAIRS AS PER RULE FOR Preliminary Examination to determine the extent of repairs necessary before the vessel is re-activated.

An examination was made of the cargo tanks, pump rooms and cofferdams of this vessel together with the Owner's Representative to assist him in making up a list of repairs for work to be done before the vessel is re-activated, stated to be sometime in 1960.

The vessel was also examined in drydock but no work was done, and was not re-coated. It was requested by the Owner's Representative that no Docking Survey be made, as before the vessel returns to service a Docking Survey will be held.

The vessel is now laid up at this port.
